Please describe any hardships you faced which prevented you from studying in a university in the past.	Fortunately, I did not encounter any serious hardships in the past, however, I am aware that many people do and we all are most grateful to UoPeople for the opportunities they provide.
How would you describe UoPeople to a friend or family member?	UoPeople is a place where everyone can learn, share and discover. A place where opportunities are given at very low cost and to everyone, with no boundaries.
What is your favorite thing about studying at UoPeople? What is your least favorite thing?	There are many good things about UoPeople and very few bad ones. The good ones include the diversity of students in the classrooms, time freedom, real life examples... Bad ones, no personal interaction with students or instructors.
How do you think your degree from UoPeople will help you in the future?	Knowledge is always welcome. As a life-long learner, a University degree helps in terms of personal satisfaction and also for career purposes. For example, I hope this degree will give me opportunities that I would not have otherwise. It can also allow me to study a specialised master's degree in a certain area of my personal interest.
